

We Know Travel- And We Do It Better

Our philosophy is that travel and accommodation services should be easily arranged through one company with one call, saving you both time and money. Mediacom Services' approach to travel management optimizes program performance through a platform built on respect of the client and project needs, while mitigating risk and providing significant savings.

Approach To The Madness

Custom sourcing & procuring

Mediacom Services, LLC listens to your specific needs. Adhering to preferences, but also suggesting cost-saving alternatives, a specialist proficient in vendor contract negotiations will use company spend data as leverage, along with vendor partnerships to obtain optimal rates.

Service & availability

A team specialist dedicated to each client allows for better communication flow and familiarity of your account. We strive to be considered a part of your team, not just a vendor. Mediacom Services also allows users to book their own travel through an interface familiar booking tool brought to you by *Deem@Work*. Rest assured, our trained agents can still assist on travel arranged via the booking tool. Demos and training are available on request.

Billing & accounting made simple

Our comprehensive reporting tools help aggregate insightful travel data vital in vendor negotiations, to identify spend patterns resulting in waste, and provide an accurate budgeting platform. Quarterly evaluations offer any necessary updates to your program. We offer on-demand reporting tools brought to you by *GRASP Technologies*, allowing users to pull invoices and multiple ways to analyze your spend data.

Getting to the point

Fees

\$35/ticket (international or domestic)
\$20/ticket if booked via *Deem@Work*
No fees on hotel or car bookings
No after-hours fees if handled by us
\$35/call 1-800 Emergency Services

Connections

With over 25 years of combined experience we know how the industry works and how to make it work best for you. Our relationships will save you money.
